

Kevin Velázquez

Senior Fullstack Engineer

Software Engineer with 4+ years of experience building production web platforms end-to-end. At Coderhouse I helped shape a new core platform from day one and now own vertical features spanning backend, frontends and AWS infrastructure. Previously shipped delivery and fintech products in Node.js, Django and React. Focused on TypeScript, domain-driven design, and clean architectures.

Professional Experience

Coderhouse – Senior Fullstack Engineer (Apr 2025 – Present)

- Bootstrapped and maintained a TypeScript microservices monorepo, defining project structure, conventions, CI/CD and tooling.
- Owned multiple vertical modules end-to-end including certificate issuance, licensing & subscriptions, staff/instructor management, and backoffice reporting.
- Led security and infrastructure initiatives: rolled out centralized RBAC, migrated authentication to OTP and managed AWS infrastructure via Terraform.

Tech: TypeScript, NestJS, Nx, Prisma, PostgreSQL, Valkey/Redis, Next.js 15, React, Docker, Terraform, AWS

Monchis Delivery App – Backend Developer (Jun 2023 – Apr 2025)

- Implemented and optimized RESTful APIs on AWS Lambda/API Gateway, reducing response times by up to 40%.
- Integrated new payment methods (Pix/PagoPar) and designed key endpoints for purchase and cancellation flows.
- Improved database performance by optimizing SQL queries and leveraging Redis for caching.

Tech: ReactJS, Node.js, MongoDB, PostgreSQL, API Gateway, AWS Lambda, AWS S3, Redis, Jira, GitHub

Key Projects

- Monchis App: Built endpoints for personalized top products and merchant rankings, integrated new payment method Upay and optimized endpoints with caching.
- Back Office Admin: Refactored merchant activation/deactivation workflow, migrated push notifications to Google HTTP v1 and streamlined CSV-based product updates.

Más Money – Full-Stack Developer (Oct 2021 – Jun 2023)

- Delivered responsive course platform: built course listing, details and profile sections integrating video streaming via Vimeo.
- Implemented Django/DRF backend powering payments (Stripe), scheduling (Calendly) and user profiles.
- Built chatbot interface with React and TailwindCSS, integrating OpenAI to customize consultations and courses.

Tech: Django, DRF, React, TailwindCSS, Stripe, Calendly, OpenAI, PostgreSQL

Penguin Academy – Programming Coach (Apr 2022 – Oct 2022)

- Led hackathon teams and mentored developers in agile practices and web technologies (Flask, Django, TailwindCSS).
- Conducted workshops on building web apps with APIs and applied Design Thinking for MVP creation.

Education

Universidad Nacional de Asunción – Electronic Engineering (2 semesters completed), Asunción, Paraguay, 2019–2020

Responsive Web Design – freeCodeCamp (2022)

Purchasing and Billing System with Python using Django LTS – Udemy (2022)

Modern JavaScript: A Guide to Mastering the Language – Udemy (2022)

JavaScript Algorithms and Data Structures – Udemy (2022)

Fundamentals of Software Engineering – Platzi (2022)

Linux Server Administration – Platzi (2022)

Node.js Advanced Course – Udemy (2023)

React JS Advanced Course – Udemy (2023)

Certifications

English Certificate – EF SET Certificate™ 57/100 (B2 Upper Intermediate) (2024)

Skills

Operating systems: Linux, MacOS

Languages: TypeScript, JavaScript, Python, SQL

Frameworks/Libraries: NestJS, Next.js 15, React, React Native, Express, Django, Django Rest Framework, Flask, Tailwind CSS, shadcn/ui, Bootstrap, Redux, Zustand, react-hook-form, Zod, Firebase

Tools: Nx Monorepo, Prisma, Yarn, Vite, Jest, Docker, Terraform, Postman, DBeaver, VS Code, Git

Databases: PostgreSQL, MySQL, MongoDB, Redis, Valkey

Cloud/Auth: AWS (Lambda, API Gateway, S3, Secrets Manager, Amplify), Heroku, GitHub, Clerk, Intercom, Vimeo API, Stripe, OpenAI

Languages: Spanish (Native), English (Fluent)
